

# STUDENT INTERNSHIP PROGRAM

Special Training Program for  
Practical / Internship Students

## Program:

- 1) Industrial 4.0 Foundation
- 2) Manufacturing Management Foundation
- 3) Office Applications Using Cloud

In an endeavour to keep our graduates abreast of new technologies, Kedah Industrial Skills and Management Development Centre (KISMEC) is offering **training program for practical/internship students**

### 1) Industrial 4.0 Foundation

- This program is the integration of cutting-edge technologies. Participants will be exposed to all related pillars, such as the Internet of Things (IoT), Cloud Computing and Big Data Analysis, as well as, application towards manufacturing and industrials process.

### 2) Manufacturing Management Foundation

- Includes practices such as creating and managing production schedules, monitoring and controlling production costs, and ensuring that production runs smoothly and efficiently.

### 3) Office Applications Using Cloud

- Refers to the use of cloud computing technology to access, manage and collaborate on office-related tasks and documents.
